...

Blood carries things to each cell that are needed. These things include oxygen and nutrients. In exchange, the blood picks up waste from the cells, including carbon dioxide, heat and excess water. The heart pumps blood throughout the body through a closed system of tubes. These tubes that carry the blood are called blood vessels.

Anatomy & Physiology - Blood

There are other human blood groups that are less common than the ABO blood group. For example, the Bombay Phenotype is a recessive condition in which the precursor of the A or B antigen, the H antigen, is not made. It occurs in about 1 in 10,000 people in India and 1 in million people in Europe.

Why do blood types matter? - Natalie S. Hodge | TED-Ed

1 Exploring America Answer Key The number in parentheses after an answer indicates the page number on which that answer is found in the text. An AV before the page number indicates that the answer is found on that page in American Voices. When an answer is found in one of the twelve suggested literature titles, the name of the book is listed.
