More commonly, a face is referred to via a face name: a Lisp symbol associated with a set of face attributes 1. Named faces are defined using the `defface` macro (see Defining Faces). Emacs comes with several standard named faces (see Basic Faces). Many parts of Emacs require named faces, and do not accept

This is the GNU Emacs Lisp Reference Manual, corresponding to Emacs version 24.5. As Emacs Lisp became such a big project over the years, we had to split this reference manual in two parts that are two separate physical books. To keep it consistent with our digital manual, the references and page numbers cover both physical books as it were one.
