It is designed as an introductory fractions lesson. It provides visual representations of fractions with the intention of breaking down the abstract.

Introduction to fractions - paper folding | Teaching Resources

Paper folding. Students explore folding paper shapes into equal parts and labelling the parts with written fractions. Select the shapes to be used according to the type of fraction being studied. Rectangles and thin strips are suitable for all fractions.

Paper folding / Number of parts only / Misunderstandings ...

Finally, they fold the newspaper so that they are only dancing on one eighth of the paper. An activity kids will love doing! They can then unfold their piece of paper to see the folds in the paper. A great discussion can take place after this game about the different fractions they created during this activity.

31 Activities and Resources for Teaching Fractions in the ...

Paper Folding. This is a youcubed favorite which comes from Mark Driscoll. The activity encourages students and teachers to engage in visual, creative thinking. We have coupled Mark's activity with asking students to reason and be convincing, two important mathematical practices.

Paper Folding - YouCubed

Enrichment: Have students use another color of construction paper to make up another fraction (such as 1/6) for this activity. Support: Help students with paper folding to make accurate fractions for this activity.

Fraction Fun | Lesson plan | Education.com

Along with these lessons in data, I also do hands on activities with fraction puzzles, pie slices, the pizza game and some worksheets. We do paper folding and create fraction books with common fractions represented such as half, fourths, thirds and so on. However, the most memorable part of the fraction unit is the data collection project.

Ideas for Teaching Fractions - SuperTeacherWorksheets

Can you fold a piece of paper in half? Of course you can, it's easy, you just match the two corners along one side. But can you fold it in thirds? You might be able to fold it into thirds with a bit of fiddling and guessing, but what about into fifths? Or sevenths? Or thirteenths? Here is a simple way you can fold a piece of paper into any fraction you would like – exactly – no guessing ...

Folding fractions | plus.maths.org

He was folding paper as he gave instruction but he was also talking and asking questions. He loved asking questions about fractions and the size of different angles. He kept using math vocabulary and encouraging us to use the vocabulary in our answers. The only way to really get comfortable with technical terms is to use them repeatedly.
